

Case Study

Weatherfield Academy, Dunstable

Weatherfield Academy is a special school with just over 115 students young people who find it difficult to maintain their progress in mainstream educational settings.

This is our second year working with Edukey and to be honest, I don't know what we would have done without them!

As part of the SLT, at a small day Special School in Bedfordshire, I was given the responsibility of researching and presenting the most effective provision Mapping tool that would best suit our needs.

Edukey's Learning Plan & Provision Mapping software stood out head and shoulders above the rest and the support service they provide is second to none. We now have their Provision Mapping firmly embedded across the Academy, which in turn has created a greater sense of ownership and accountability for staff leading on the various interventions. Lead staff are able to add, amend, adjust, review and even clone each intervention quickly and effectively by remote access.

Edukey have many great products and features but for me in my current role, one of the most useful has been the Provision Reports, that can quickly be produced against any number of set criteria. We have used them successfully for parents, as part of a students EHC review meeting, evidence for Local authorities, justifying pupil premium spending and to inspectors looking at the value added nature of our intervention across year groups and the whole school.

If you want to set up a simple and effective IEP or Provision Mapping system at your school? Speak to Edukey. Once you've used their software, you will never look back!
